

December 6, 2021

Dear Mr. Candidate,

I think the minimum wage in USA should be depending on which state you live. For example, in Colorado it should be 10 dollars an hour. I think it would look better like that because of the gas prices right now. Also, maybe people are trying to buy special needs for Covid, and I think people need that right now because the Covid thing gets worse. Probably in some states like California its going to so much expensive and so some people might work in LA because were going to give them more money so there going to pass the states, but we will have police people searching and if that is illegal money from different state then they are going back to LA.

And its not only going to be in LA its going to be in every state that has a lot of money as their wage.

Also, we rase the wage because we feel that some jobs should deserve more money than other so for example a fast-food restaurant gives 10 dollars an hour as their wage but their jobs like working for dental like working with teeth the get only 7.25 dollars an hour. So, see that's not fair that's why we put a rase to those jobs.

Plus were going to make one thing the work is going to start at 8 and end at 7 o'clock. I think that's fair because some people don't sleep, they work all the time. For example, a truck company needs to deliver boxes to the store, but the stores open at 7 and the others store open at the same time, so he must deliver them at night. So basically, while other people sleep in peace others must work at night with no sleep at all. I know that is not talking about the wage it's just that I think its unfair too.

Plus, it's kind of connecting to the wage because he will work more hours but still get paid as much as in a day but he works day and night. Maybe the people that work as twice as much as the other people are earning the same. If you vote for us we will make this thing, come true. And we promise that because other people promised too but they never did. And we like when our country looks nice and looks polite also when people are nice and don't want to be bad about our president and about our people behind it.

Sincerely,

Andrei Haurylau
